Analysis of management performance and consolidated financial status

(1) Explanation of operating results

For the fiscal year 2017 (from January 1 to December 31, 2017), the sales revenues were 429,664 million yen (3,391,193 thousand EUR), the operating income was 29,391 million yen (231,976 thousand EUR), and earnings before taxes were 24,803 million yen (195,769 thousand EUR). The income attributable to owners of the parent was 15,263 million yen (120,469 thousand EUR). (Euro amount is converted from yen at 126.7 yen/EUR, the average exchange rate between January 2017 and December 2017.)

Our society is facing radical changes such as the shift to EV (Electric Vehicle), advance of AI (Artificial Intelligence), and aging population. In the midst of such a social-economic transformation, DMG MORI strives to continue being an important role player in the society and become a company that comprehensively provides the best solutions for customers. We promote the dissemination of 5-axis control machines, the automation of workpiece transfer and the integration of machining and measuring processes to offer optimal production processes for achieving complex machining in a highly accurate and efficient way.

As for the business strategy, we put a greater focus on Connected Industries/Industry 4.0 innovations. The open industrial IoT platform "ADAMOS" (ADAptive Manufacturing Open Solutions) centrally manages data of multiple production line machines such as machine tools and measuring systems in order to enhance the accuracy of maintenance and production planning, and to predict machine failure. We go ahead with "open innovation" in collaboration with partner companies and offer high-quality peripherals that contribute to the reduction in setup time, one of the critical issues of many customers. To deliver stable quality automation systems in a short time, we work on modularization of units such as workpiece stockers and on-machine measuring systems. We offer customized systems and turnkey solutions as well as standard automation systems, and provide customers with total and full support for their system installation.

As for the technological aspect, the DMU 50 3rd Generation, a 5-axis control machining center and the NHX 5500 and 6300 2nd Generations, horizontal machining centers released in the domestic market last October have drastically improved their cutting abilities by mounting in-house developed, high-performance "MASTER series" spindles. The NTX 3000 2nd Generation, a mill turn center with a 12-inch chuck which was showcased as the world premiere at an Open House in Pfronten, Germany in January, is equipped with the "MASTER series" spindles on both the spindle and the tool spindle to achieve high-speed and high-accuracy machining. From this January on, the warranty for the "MASTER series" was extended from two years to three years so that we can bring higher reliability, safety and comfort to customers. DMG MORI continues to develop a wide range of new products to provide cutting-edge technologies for customers.

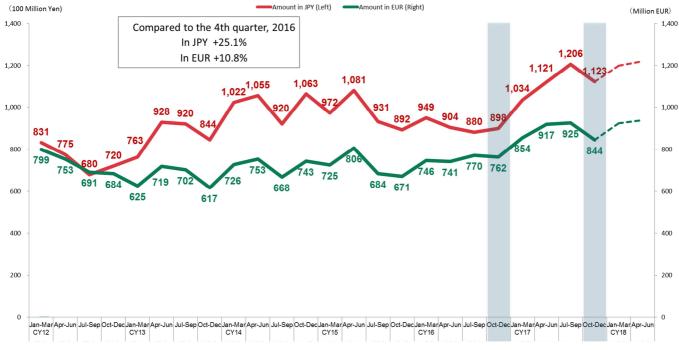

As for the sales, we presented the Connected Industries/Industry 4.0 solutions at Mechatronics Technology Japan (MECT) 2017 held in Nagoya, Japan in October. In November, we gave exhibitions and showroom tours at the factories in Seebach, Germany; Davis, the U.S.; and Ulyanovsk, Russia, and received favorable reviews from various fields such as the medical, die & mold and aerospace industries. In the same month, Shanghai Technology Center was newly opened with DMG MORI Academy, a showroom, a turnkey area and a spare parts division set in an area of some 1,700 m2. The center provides the best products and solutions for customers in China and the nearby countries. In the coming nano tech 2018 to be held in Tokyo this February, we will showcase the latest additive manufacturing solutions with a live demo of 3D parts molding on the LASERTEC 30 SLM.

We facilitate "work style reform" by encouraging employees to take paid leave, adopting flextime with core hours, making mindset changing efforts to eliminate overtime work and constructing in-company child care centers. DMG MORI supports its employees' in various aspects of their lives under the motto of "play healthy + active," "work together + innovative," and "study smart + deeper," and the entire company will work together for further growth and prosperity.

The orders for machine tool-related products during 2017 totaled 448.3 billion yen, which is an increase of 22% year-over-year. Although the 2017 financial forecast was revised upward after the third quarter from 410 billion yen to over 430 billion yen due to strong demand, the final results turned out to be much higher than the revised value. Orders for machine tools including peripherals and Technology Cycles achieved a 30% increase over the previous year. In addition to an increased number of orders, some other factors contributed to the greater full-year result: high-value added, high-functionality 5-axis control and mill turn machines accounted for a larger portion of the total order volume, and order intake unit prices rose by sales growth of advanced solutions.

The demand environment in each market was steady, and we ended up with an increase of 43% in Japan, 22% in Americas, 25% in Europe and 34% in Asia including China. The demand from the semiconductor-related industry was high throughout the year. During the second half of the year, the demand for automation-related equipment such as robots and transfer units showed a significant growth, and the positive momentum affected general machine parts companies and SMEs (Small Medium-sized Enterprises), resulting in increased demand in the relevant fields. The demand

from the aircraft, medical-related, automotive-related and construction machinery-related industries also remained strong. The demand from only the energy-related industry showed a slow recovery, but it is expected to turn positive because of rising commodity prices including oil. DMG MORI aims at achieving the target order volume for 2018 of over 450 billion yen with its strength, management resources which are our multi-function, high-productivity and high-quality products and solution providing capability.

| Ratio of equity attributable to owners of the parent measured at fair value(%) | 30.5 | 49.7 |
| Cash flows to interest bearing loans ratio (%) | 1,164.3 | 632.59 |
| Interest coverage ratio (times) | 6.0 | 10.8 |

(Notes) Ratio of equity attributable to owners of the parent: Equity attributable to owners of the parent / total assets Ratio of equity attributable to owners of the parent measured at fair value: Market capitalization / total assets Cash flows to interest-bearing loans ratio: Interest-bearing liabilities / operating cash flows

Interest coverage ratio: Operating cash flows / interest payments

These indexes are calculated based on consolidated financial figures.

- · Market capitalization is calculated based on the closing share price at end of term x outstanding shares (excluding treasury shares) at end of term
- For cash flows, "Cash flows from operating activities" from the consolidated statements of cash flows is used. Interest-bearing liabilities include all liabilities on the balance sheets that incur interest. For the interest payments, the amount is based on the "Interest paid" on the consolidated statements of cash flows from which continuous compensation payment arising from the domination agreement is subtracted.

(4) Basic policy concerning profit appropriation and dividend payment

The DMG MORI Group strives to enhance corporate value for our shareholders, who understand that machine tools are both capital assets and products which need longer period of investment cycle, from 10 to 20 years. Our principle for profit appropriation is stable and continuous payment of dividend based on an overall judgment concerning our future business plan, business results, financial conditions, and so on. For internal reserve, we continue to invest in the development of pivotal new products and technologies as well as consolidating our production equipment in order to reinforce our competitive strength in the market.

We plan a special dividend of 10 yen per share in addition to the ordinary year-end dividend, in commemoration of the Company's 70th anniversary to express gratitude to shareholders. For FY 2017, we issued an interim dividend per share of 15 yen and year-end dividend per share of 25 yen (special dividend included), for a full-year total of 40 yen.

For FY 2018 we plan to issue an interim dividend per share of 25 yen and year-end dividend per share of 25 yen, for a full-year total of 50 yen.

2. Basic policy for selection of accounting standards

We have introduced the International Financial Reporting Standards ("IFRS") to improve international comparability of financial information since fiscal year 2015.
