

Press Release

October 24, 2007

2-Year Warranty is Extended for High-Speed Spindle Units

**Mori Seiki will extend the coverage of our warranty,
to offer even higher quality service to customers.**

In order to provide customers with even greater satisfaction, Mori Seiki has revised the **"2-Year Warranty"** system in Japan and overseas, so that it covers **high-speed spindle units** as well.

This revision extends the period for cost-free repairs for high-speed spindle units from the previous 1 year to 2 years, and will be valid for models installed after October 1, 2007.

The "2-Year Warranty" service we have been providing for models installed since April 2007 without high-speed spindle units will also be available for high-speed spindle units, so that we can offer even higher quality service to our customers.

By doing this, we guarantee that we will provide parts for repairs, service and maintenance free of charge for machines delivered within Japan, including high-speed spindle units, for 2 years from the date of installation. For machines delivered overseas, we will provide parts for repairs, including high-speed spindle units, free of charge for 2 years from the date of installation, and parts for service and maintenance for 1 year.

Mori Seiki will continue to do our best to supply high-precision, high-efficiency machines and even better service, for our customers' satisfaction and peace of mind.

■ Warranty periods for "2-Year Warranty"

| Destination | Parts for repairs provided cost-free | Service/maintenance parts provided cost-free |
|-------------|--------------------------------------|--|
| Japan | 2 years | 2 years |
| Overseas | 2 years | 1 year |
