### Relocation of Global Parts Center

We are pleased to announce that our Global Parts Center has been moved to Nara campus (Kitakoriyama-cho, Yamato-Koriyama City, Nara) from Iga campus (Iga City, Mie) and started its operation.

A reason of relocation

- To strengthen the support system and spare parts of DMG products installed in Japan.
- To combine the spare parts that was spread among Iga campus
- Because Nara has late pick up service compared to Iga and Kansai International Airport is located near, it will improve convenience of distribution.

An existing premise is used for its storage with mobile rack newly installed. Its floor space 12,000 m<sup>2</sup> is the same size as previous, and total investment took 500 million yen including spare parts transportation and we have hired 30 new employees.

A consolidated performance of parts division is 20 billion yen. For those of major countries, we hold over 90% shipments within 24 hour after receiving an order. We will continue supporting 100 thousand customers by cooperating with parts centers in Nara, Dallas (America), Stuttgart (Germany), Shanghai and Singapore.
