Construction of DMG / MORI SEIKI Tokyo Solution Center

Mori Seiki Co., Ltd. is pleased to announce its plan to construct the DMG / MORI SEIKI Tokyo Solution Center in Shiomi, Tokyo.

The new facility will house a showroom on the first floor, in which 25 to 30 machine tools from both Mori Seiki and DMG will be on display. The Tokyo Solution Center is expected to serve not only as a showroom, but also as an opportunity to develop new machining technologies in conjunction with customers and as a customer support base by providing training on the latest machining techniques to DMG/MORI SEIKI 5-axis machine owners living in and around Tokyo, in the Tohoku region and nearby Asian countries.

Our existing Tokyo branch office, presently located in front of the Shinagawa Station, will move to the new building, and the department engaged in promoting joint sales activities with our German collaboration partner GILDEMEISTER AG will have an office on the fifth floor.

The outline of the DMG / MORI SEIKI Tokyo Solution Center is shown below.

<DMG / MORI SEIKI Tokyo Solution Center>

Address: 2-2-105 Shiomi, Koto-ku, Tokyo (Two minutes' walk from Shiomi Station on JR Keiyo Line)
