Opening of DMG MORI Die & Mold Excellence Center

DMG MORI CO., LTD. proudly presents the grand opening of Die & Mold Excellence Center, a facility dedicated for the promising die & mold industry.

With the recent growth in the automotive and semiconductor industries, we expect an increasing demand in sheet-metal and resin molds. In response to the growing needs, Die & Mold Excellence Center offers customized solutions, combined with in-house and cutting-edge machining technology. Customers' voices and latest machining technology, including those from Europe, are incorporated to achieve greater accuracy and shorter lead time. This approach is commonly and effectively applied for challenging production of large-sized molds for automobiles (pressing, injection mold, die casting etc.) and high-precision molds.

Test cutting and time study are available to improve customers' familiarity in unmanned operation and automation, while we also offer demonstration cutting, exhibitions and seminars to proactively communicate our high-quality machining methods. Our rich and successful experiences in domestic and international markets make us the best and unique solution provider.

◆Die & Mold Excellence Center

Location :Inside Global Solution Center, DMG MORI Iga plant
201 Midai, Iga, Mie, Japan

Exhibited machines :DMC100UduoBLOCK, DMU75monoBLOCK, DMU40eVo, HSC30linear,
NVX5080 2nd Generation, LASERTEC45Shape
