Production Launch Ceremony for CMX 600 Vi VMC at Lakshmi Machine Works in India

DMG MORI CO., LTD. (hereinafter called DMG MORI) held a production launch ceremony for the CMX 600 Vi on October 29 (Tue.) at Lakshmi Machine Works Limited (hereinafter called LMW) in Coimbatore, India. At the ceremony, Masahiko Mori, President of DMG MORI, and Mr. Sanjay Jayavarthanavelu, Chairman and Managing Director of LMW, extended greetings and cut the ribbon with guests.

DMG MORI will begin manufacturing the CMX 600 Vi vertical machining center in India where the demand for machine tools is expected to grow. The machine, specialized for Indian customers, is manufactured at the LMW's factory with an initial production volume of 10 units a month. The production volume will be increased in stages.

LMW is a leading manufacturer of textile machinery and machine tools in India. The company was founded in 1962 as a textile machinery manufacturer and began partnership with DMG MORI about 30 years ago. Currently, LMW's machine tool division provides lathes, milling machines and turn-mill machines as well as automation solutions.

Through local production, DMG MORI strives to enhance services in India and deliver products with shorter lead times.
