

## Press Release

March 1<sup>st</sup>, 2023

# DMG MORI opens new TULIP Experience Center Test the DX platform for production in Nagoya!

DMG MORI CO., LTD. (hereafter “DMG MORI”) and the group company T Project CO., LTD. (hereafter “T Project”) jointly opened a TULIP Experience Center (TEC) in Nagoya. TULIP is a platform to digitize shop floor operations of production sites, and T Project promotes TULIP in Japan.

This is the second TEC to be established in Japan, following the opening of the first TEC in August 2022 inside the office of T Project in Tokyo, Koto-ku. The second TEC is located inside the headquarters of DMG MORI SALES AND SERVICE CO., LTD., which is right next to Nagoya station. This makes the TEC in Nagoya easily accessible for customers and partners in the Chubu and Kansai areas of Central and West Japan. At TEC Nagoya, visitors can experience TULIP’s latest technologies at two work benches, which demonstrate how to use TULIP with several connected devices. Visitors can also watch videos that introduce the various possibilities of TULIP.

TULIP work benches at TEC Nagoya

From TEC Nagoya, T Project will promote TULIP and support its users in Central and West Japan. In the near future, additional TECs will be opened in Tokai, Hokuriku and other areas of Japan to give all manufacturers across the country the opportunity to experience TULIP first-hand.

## Location of TEC Nagoya

2-35-16 Meieki, Nakamura-ku, Nagoya, Aichi 450-0002, Japan

DMG MORI SALES AND SERVICE CO., LTD.

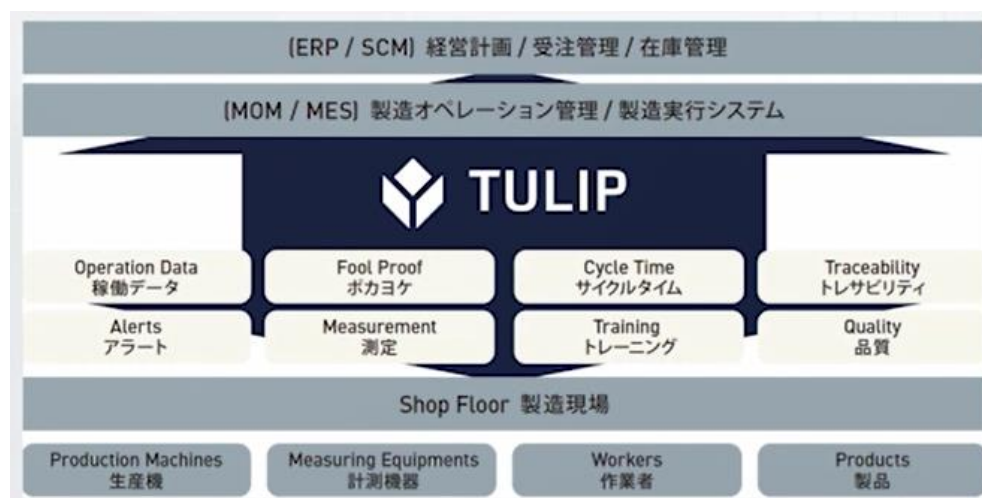

\*If you would like to visit, please make a reservation on the website of T Project (only in Japanese):

## About TULIP

TULIP is an application platform that solves shop floor problems with digital technology

1. Create customized applications for your processes to increase productivity
2. Easily standardize processes with digital tools to prevent human errors and automatically collect data
3. Can be connected to ERP systems and devices in the factory for real-time monitoring and efficient production management
