

Press Release

September 8th, 2023

Opening of DMG MORI ACADEMY Sendai

DMG MORI CO., LTD. (hereinafter “DMG MORI”) has opened a new DMG MORI ACADEMY in Sendai as a training facility for customers and local students to study advanced machining on 5-axis machine tools.

In the past, DMG MORI had already opened 3 academies in Tokyo (Koto-ku), Iga (Mie Prefecture), and Nagoya (Aichi Prefecture) to support the NC-machine training of young engineers and customers. DMG MORI has decided to open 5 additional academies across Japan until 2025 to offer practical training on actual machines to customers and students at each location. Following the opening in Hamamatsu on April 26 and Kanazawa on May 12, Sendai is now the third academy to open. The remaining three academies will be opened in Okayama (2024) and Fukuoka (2024).

Like Hamamatsu and Kanazawa, the academy in Sendai is equipped with DMG MORI machines and devices, including the DMU 50 3rd Generation 5-axis machine, the NTX 1000 2nd Generation mill-turn center, the DX platform TULIP, and more. Our experienced engineers will provide private lessons that are tailored to the different needs of each customer. To maximize the learning effect, customers can also learn with the e-learning courses provided by “DMG MORI Digital Academy” at home, while taking practical lessons on the weekends. Customers are free to design their own study schedules that combine hands-on classroom lessons with online courses. The opening ceremony of the academy in Sendai was held together with customers and school officials in the area on September 7.
