The 47th WorldSkills Competition: DMG MORI hosted the Qualification Tournament for CNC Turning & Milling Categories in IGA Campus

From October 8 to 10, DMG MORI CO., LTD. (hereinafter “DMG MORI”) hosted the Qualification Tournament at Iga Campus, Japan, for the selection of the Japanese delegation for CNC Turning & CNC Milling categories at the 47th WorldSkills Competition.

The WorldSkills Competition is held every two years to promote vocational training in the participating countries, international exchange and goodwill among young professionals*¹. From Japan, the competition is officially being sponsored by the Japanese Ministry of Health, Labour and Welfare (MHLW) and the Japan Vocational Ability Development Association (JAVADA). DMG MORI has also long been invested in the development of young talents and the skill improvement of the manufacturing industry as a whole and has continuously supported the WorldSkills Competition through consignment of machine tools since the 39th time in 2007. This time, we have provided two NLX 2000 | 500 Turning Centers and two NVX 5080 | 40 2nd Generation Vertical Machining Centers for a total of four machine tools as well as the venue for the Qualification Tournament.

In addition, a guided tour through the Iga Global Solution Center was conducted on the three tournament days for the people concerned, showing DMG MORI’s newest 5-axis Milling Machines and Additive Manufacturing Machines, as well as MX (Machining Transformation) on basis of GX (Green Transformation) with Process Integration, Automation, and DX (Digital Transformation).

DMG MORI will also provide machine tools for the main WorldSkills Competition to be held in Lyon, France, in September 2024. We will continue our support of the Competition and the Tournament to proactively foster the talents of tomorrow.
